

AngelEye View

AngelEye View is an LED-lighting system for swimming pools comprising an underwater video camera.

Your smartphone or personal computer – providing they're connected to either your home network or the internet – allow you to watch real-time images from the video camera.

Via a simple and intuitive software interface you can view real-time images, save a video or take a snapshot.

Besides, you can turn on or switch off the video camera-integrated LED light or control any other lights you may have in your pool.

System configuration is automated; it takes place by simply connecting the system to your home network.

AngelEye View is available with either one or two video cameras, with LED lights.

Technical Specifications

Typical Customer	Recommended solution for domestic swimming pools.
Pool Types	All types of pool, including those made of steel, tiles, PVC and fiberglass.
Pool Size	From the minimum length of 5 meters to a recommended maximum of 18 meters, with rectangular or irregular shapes.
Number of Camera Devices	Two versions, i.e. with 1 or 2 video cameras plus LED lights.
Underwater Device Types	LED-lights with integrated safety sensors and video cameras, which one can install to replace pre-existing lights.
Central Control Unit	This is made up of all suitably-configured hardware and software components the system needs to function.
LED Lighting	Each underwater device includes – on top of the high resolution colour video camera – one set of long life, white LED lights.
Installation	<p>The installation is care of the client and can be carried out with the help of local technicians.</p> <p>AngelEye delivers pre-configured systems so as to be operational as soon as the installation is finished.</p> <p>Technical support by AngelEye – round-the-clock on demand – can guide personnel through the installation phases as well as provide all the necessary technical documentation.</p> <p>The installation method for underwater devices is akin to that of all pool lights; therefore, it is easy to implement by the abovementioned technicians.</p> <p>Underwater devices come with niches and can be installed in any available niche devoted to pre-existing lights; in this case, no invasive interventions to the pool are needed.</p>
